Historique

#1 - 01/11/2016 14:11 - Eric Seigne

- Catégorie mis à Clients Linux
- Assigné à mis à Eric Seigne
- Version cible mis à AbulÉdu - Client - DVD 11.08.1

Bon, mauvaise pioche avec ce bug ... on a un énorme mic-mac qui est super vieux et quasi impossible à dépêtrer en quelques heures "techniques" ... il faut réfléchir un peu plus global et prendre des décisions presque plus "politiques" ... la bonne nouvelle c'est qu'on a tout en main pour résoudre le problème.

Ce paquet en version 2.2 ne devrait plus exister depuis un bail, car il est en version 11.08.2ryxeo1~lucid1 depuis le 27 Dec 2013 !!!!

Il semblerait en plus que ça soit sur la version 11.08 du client lourd ...
