configuration de bind9 pour bénéficiaire de rpz

26/07/2018 18:59 - Eric Seigne

Statut:	Assigned - En cours	Début:	26/07/2018
Priorité:	Normale	Echéance:	
Assigné à:	Eric Seigne	% réalisé:	0%
Catégorie:		Temps estimé:	0.00 heure
Version cible:	11.08.x		

Description

Lié à [#5003](#): bind9 pour RPZ:

- named.conf.options

```
response-policy {  
    zone "rpz";  
};
```

- named.conf.local

```
zone "rpz" {  
    type master;  
    file "/etc/bind/db.rpz";  
    allow-query {none;};  
};
```

- db.rpz

```

Pour bing: <https://help.bingads.microsoft.com/apex/index/18/en-US/10003>

If you want to guarantee strict SafeSearch results for all users on your network, in your router or proxy server map www.bing.com to strict.bing.com. Strict.bing.com will guarantee that strict SafeSearch results are returned for all queries to this IP and the SafeSearch controls are disabled.

<https://support.google.com/a/answer/6214622>

Configure Domain Name System (DNS) on your network to add a Canonical Name (CNAME) for the following hostnames:

- www.youtube.com
- m.youtube.com
- youtubei.googleapis.com
- youtube.googleapis.com
- www.youtube-nocookie.com

For Strict Restricted YouTube access, add restrict.youtube.com as a CNAME for these domains. For Moderate Restricted YouTube access, add restrictmoderate.youtube.com as a CNAME for these domains.
